

Floor Shopping List

Everything the production floor still needs, grouped by station. Example models are suggestions — match or beat the spec in the middle column. Prices are ballpark USD; check current B&H pricing before ordering.

■ COMIC PHOTO STATION (B&H)

Fixed overhead camera over the 24"×24" six-comic panel. The camera never moves; the operator lays comics, steps on the pedal, swaps the panel.

ITEM	WHAT IT MUST DO	EXAMPLE PICK	≈ PRICE
☐ Mirrorless camera	24 MP+, USB tether control (computer triggers the shutter), flat lay of a 24"×24" field — every comic ends up ~1,600×2,500 px, plenty for the AI to read covers	Canon EOS R50 with 18-45mm kit lens (Canon's tether SDK is the industry standard) — B&H · Amazon	\$799
☐ Overhead mount	Hold the camera rock-steady ~30–36" above the table, pointing straight down, out of the operator's way	Impact Turtle Base C-stand kit, 10.75' with 40" grip arm — B&H — plus a sandbag	\$169
☐ Lighting ×2	Even, flicker-free, DIFFUSE light from both sides at ~45° — comics are glossy and glare is the enemy. Continuous LED, not strobes	Godox SL60II-Bi 2-pack kit with softboxes + stands — Amazon (2-pack kits are Amazon's strength; B&H sells the pieces separately)	\$300–340
☐ Foot pedal	USB, programmable to a keystroke — the hands-free shutter trigger	Kinesis Savant Elite2 single (Amazon) — rock solid, ~\$99; or a budget USB footswitch ~\$25	\$25–99
☐ Paper background	Neutral matte surface under/behind the panels; replaceable when scuffed	Savage Widetone 53"×36' — B&H (White) · Amazon (#20 Black)	\$60–90
☐ Tether cable	15 ft USB (camera → controller PC), with a strain-relief tie	TetherPro USB-C 15' orange (Amazon) — or any quality 15 ft USB-C 3.x cable for ~\$25	\$25–70

ITEM	WHAT IT MUST DO	EXAMPLE PICK	≈ PRICE
☐ Spare battery + AC coupler	The camera runs all day — wall power, not battery swaps	LP-E17 dummy-battery AC power kit — Amazon search — ⚠ confirm the listing names the EOS R50	\$30–80

■ STATIONS — SMALL STUFF ONLY

Guns, printers, PCs, and monitors are covered from stock. What's left is consumables sized to the printers you have.

ITEM	WHAT IT MUST DO	EXAMPLE PICK	≈ PRICE
☐ USB speakers ×3	The tones are load-bearing — every station (scan, bagging, boxing) must be audible over room noise. Skip any station whose monitor already has decent speakers	Any powered USB speaker pair or sound bar per station	\$15–25 ea
☐ Label stock — 4"×2"	Bag tickets: removable adhesive so they peel off the carrier cleanly. Match your printers (direct thermal vs thermal transfer vs sheet)	4×2 rolls, a few thousand to start	\$40
☐ Label stock — 4"×6"	Jumbo box label pairs (base + lid, 100–150 boxes)	4×6 rolls ×2, matched to your printers	\$30
☐ Laminating pouches	The SET-ASIDE card (already printable from the Bagging screen) and future badge cards	Any 5-mil letter pouches + access to any laminator	\$15

■ NICE TO HAVE — NOT BLOCKING ANYTHING

ITEM	WHY	EXAMPLE PICK	≈ PRICE
☐ Touchscreen monitor	The comic kiosk's big-button screen (a normal monitor + mouse works until then)	ViewSonic TD2223 22" USB touch	\$200
☐ Long-range scanner	Reading jumbo box labels from 4–6 ft once boxes are shelved — the jumbo labels were designed so a standard imager mostly copes; buy this only if real-world range disappoints	Zebra DS3608-ER	\$450
☐ UPS battery backup	The controller PC and camera survive a blink mid-panel	APC 600VA	\$70

ITEM	WHY	EXAMPLE PICK	≈ PRICE
☐ Grey card	One-time white balance for true cover colors	Any 18% grey card	\$10

≈ \$1,500	≈ \$145	≈ \$1,650
COMIC PHOTO STATION	SPEAKERS + LABEL STOCK	CORE TOTAL (WITHOUT NICE-TO-HAVES)

ALREADY COVERED — DO NOT BUY: PCs, monitors, keyboards, mice, label printers, handheld scanners, and accessories (your stock) · fi-8170 scanner (ordered) · yellow bins & 5-row card houses (ordered) · 24"×24" panels (~\$7 ea, ordered) · Dropbox 2TB (subscribed) · all software (built).
